Activity

During the 3rd quarter of 2015 the Precia Molen Group achieved a turnover of 24.9 M€.

For the first nine months of the year 2015, the turnover is 77.8 M€, increasing by 12.7% compared to the same period in 2014. At constant perimeter and currencies rates, organic growth amounted to 3.8%; most of the growth (7.8%) resulting from acquisitions while currencies effects amount to 1.1%.

Activity for the third quarter follows the same trend as the first half although slightly diminished by the summer period with a backlog progressing slower. During these nine months, the Group observes a convincing increase of its sales of products in France and in some export markets to which is added the successful integration of recent acquisitions. Internationally, our Indian subsidiary is expanding strongly while the turnover of Precia Molen Morocco is down due to a very unfavorable comparison base

Forecasts and outlook

The backlog of the company has remained well oriented on the year end although in slight decrease compared to the first half. The Group turnover for the year 2015 should therefore exceed the target set at 100 M€.
