Application

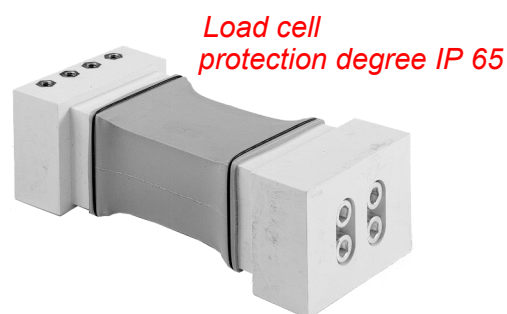

PRECIA/MOLEN designed the K range of platform scales for use in industrial environments to comply with strict hygiene requirements. Made of composite material, K range platform scales provide the perfect solution for applications in areas which require frequent cleaning and where anti-bacteriological products are used.

- Platform scale made of composite material :
Bottom plate and platform bearer made of thermo-hardening composite material. Housing of ABS. 4 Adjustable, non-skid feet made of Kraton (Ø 65 mm).
- Particularly suitable for harsh or aggressive industrial environments (protection rating IP 54 or IP 65).
- For table top or floor installation.

Robustness, ease of cleaning and the use of materials approved by the food industry were key design criteria for the K range of platform scales.

European Conformity

Compliant with the definition of a conventional load receptor in accordance with the guide WELMEC 2.4.

Physical characteristics

Dimensions

- Length 400 mm
- Width 400 mm
- Height 140 mm
- Scale platform 360 x 360 mm

Feet

- Centre-to-centre distance 340 x 340 mm
- Thread of feet bolts M 10
- Weight approx. 12 kg

Options & Accessories

- Stainless steel scale platform.
- Overlapping stainless steel scale platform (430 x 430 mm).
- Column set for installation.
